

Breathe easier, live greener,
and go further than **ever before.**

At the forefront of **Construction & Advanced Materials**

Solutions for Sustainability, Safety, & Performance for Environment, Infrastructures, Buildings, and People

More than a provider, a partner

At Alkegen, our belief in service extends to every point of contact as transactions transform into relationships. We're more than just a supplier of specialty materials to buy from, we're a partner offering an integrated platform of solutions featuring unmatched service and product innovation of the highest, most uncompromising quality. It's a commitment to supporting our customers.

Advanced Materials Solutions

The most sought-after platform of advanced materials in the world

Innovative and custom nonwoven solutions for:

- Building & Acoustics
- Medical & Wipes
- Industrial Converters
- CIPP & Extrusion
- Transport NVH Solutions

Our unique and rapid prototyping service and state-of-the-art production lines allow us to develop new custom solutions very quickly.

Our expertise, as well as our manufacturing and finishing capabilities, enable us to explore new opportunities with customers to bring innovative products to the market. If you need something different, we can develop custom and unique solutions.

We live for responsive partnerships for better service and better products.

We offer a wide range of innovative and environmentally friendly products while ensuring a level of performance and efficiency that meets the expectations of our clients.

Geosynthetics Solutions

Innovation at the service of geosynthetic applications

Alkegen Texel geosynthetic solutions help customers at every stage of their civil engineering, environmental, and landscape architecture projects.

We cover a wide range of applications and solutions for; soil separation, reinforcement, stabilization, weed control as well as winter protection for trees and shrubs.

Our products enhance performance and ensure the sustainability of the new trends in green space development.

Fire Protection Solutions

Wide range of solutions for a variety of passive fire protection applications:

- Commercial buildings: fire, resistant duct
- Systems-critical electric circuit protection
- Transport: railroad tank cars & aerospace
- Marine: ships & offshore platforms
- Specialty: coating additives & other

Our FyreWrap® product family provides proven systems and solutions to meet international fire standards and code requirements in commercial building, transportation, and appliance applications.

We manufacture a wide range of fire protection products for applications where high heat or risk of fire is a problem. We provide systems and solutions to protect buildings, equipment and people against potential fire hazard.
